Forecast for Sunday 01 Oct 2023

Weather: Persistent rain will continue through the early hours and the morning, heavy at times especially on western slopes. Rain is likely to start to ease into the afternoon, becoming mostly dry by early evening.

Chance of cloud-free hill tops above 600m: Less than 10%, becoming 40% by mid-afternoon and then 90% for the evening.

Low cloud and visibility: Widespread low cloud, base 200-400m, through the early hours and the morning. Cloud base lifting to around 500-600m by mid-afternoon, then lifting further and breaking into the evening with most slopes becoming clear of cloud. Visibility mostly poor or very poor in rain and low cloud covering the hills. Improving for the evening, becoming mostly good.

Meteorologist's View

Strong winds through the early hours will make for arduous walking at first, but this gradually easing. Heavy rain could lead to swollen watercourses and possible flooding. Good navigation skills will be needed, although conditions will start to improve late in the day.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Forecast for Monday 02 Oct 2023

Weather: Areas of low cloud developing overnight, perhaps with a little drizzle, but dry for most. Cloud thickening before dawn with outbreaks of rain likely through much of the day, possibly heavy at times. Some uncertainty as to the timing of this rain, however. Rain is most likely to clear during the evening.

Maximum wind: Westerly or southwesterly 10 mph gusting 20 mph, during the morning.

Chance of cloud-free hill tops above 600m: 60% at first, soon becoming 20% for much of the day.

Low cloud and visibility: Areas of low cloud overnight, base 400-500m, becoming widespread near dawn with patches down to 300m, likely not clearing until evening. Visibility often poor or very poor in rain and low cloud covering the hills.

Temperature: **Valleys:** Plus 13 Celsius.
At 600m: Plus 11 Celsius.
Freezing level: Above the hills.
